

LED ULTRASTAR BEACON

4143 LED

available in: 

\$199.50

Federal Signal introduces zero maintenance lighting with LEDNODE™ technology in our LED ULTRASTAR™, the beacon that rivals the performance of a Class 1 strobe beacon.

This beacon incorporates a high-intensity, solid-state light source and fully encapsulated digital circuitry. Additionally, our revolutionary LEDNODE technology utilizes long-life LEDs, outliving strobe tubes by a colossal 50 to 1. Superior optics, in conjunction with the LEDNODE emitter, combine to produce a bold, high-intensity flash. It's the only Class 1 LED beacon of its kind; designed specifically for extreme shock and high vibration large vehicle applications and is backed by a 5-year warranty.

The LED ULTRASTAR is multi-voltage (12-24 VDC) and comes equipped with permanent/1" pipe, magnetic, and J-Bolt mounting options. All models feature ten selectable "strobing" flash patterns that draw a maximum of 1.2 amps, greatly reducing the demand on your vehicle's electrical system.

So, accelerate your lighting systems beyond the next generation by choosing the light that will outlast the life of your vehicle.

Solid-state light source and fully encapsulated circuitry to absorb extreme vibration

Permanent/1" pipe mount bottom

J-bolt mount holes with hardware
(J-Bolt hardware sold separate)

Magnetic mount bottom with
cigarette lighter plug

FEATURES

- Industry standard mounting for quick and easy retrofits.
- Ten selectable "strobing" flash patterns.
- Superior optics for maximized light output.
- Longer dwell time to enhance visibility at a distance.

APPROVALS

- SAE J1318 and J845 Class 1

REPLACEMENT PARTS

- Z8444374-02 Lens, red
- Z8444374-03 Lens, amber
- Z8444374-04 Lens, blue
- Z8444374-01 Lens, clear
- Z8444374-06 Lens, green
- Z8444375-01 Dust cover, clear
- Z8444313 Light shield
- Z8444397 J-bolt mounting kit
